

# Daonomic

**Tokenize a company, a fund or other assets.  
Unlock liquidity. Reach global investors.**

Introducing an automated solution to launch blockchain tokens and token sales fast.  
Tokenization made simple - no coding required!

## Benefits

### EASY & FAST

Arrange everything for Initial Coin Offerings or Securities Token Offerings.

### PROVEN

Trusted by companies raising millions from global investors.

### SECURE

#### End-to-end solution

The platform itself doesn't hold crypto coins received from token buyers. Instead, they go directly to the issuer's wallet.

#### DDoS protection

Multiple levels of DDoS protection.

#### Real-time backups

All production systems and data are duplicated in the real time.

### REAL-TIME EMISSION

Buyers receive tokens immediately after the KYC and payment.

### USER-FRIENDLY

Modern UI - no need to reload pages. Easy to use even for those who are new to crypto.

### ALL TOKEN TYPES

Utility, Equity and Securities.

### USD BASED PRICING

Token prices are shown in USD based on the current market rates of cryptocurrencies.

## Features

### INVESTOR DASHBOARD

Personal investor accounts for token buyers. Customizable investor accounts that can be integrated with any token sale websites.

### ACCEPT CRYPTO

Proprietary solution to accept payments in various cryptocurrencies for token sales from decentralized wallets or exchanges.

### SMART CONTRACT GENERATOR

Self-serve solution to create new token sales with no programming required.

### BROKER DEALER SERVICES

Our registered broker dealer partner provides compliance supervision, oversight, subscription escrow, advertising approval for securities and equity token offerings.

### KYC FORMS AND A SERVER

Pass the data to the appropriate KYC provider or use our personal KYC server hosted on your side. API integration with providers to perform KYC/AML and a verification of accredited investor status.

### FLEXIBLE HOSTING SOLUTION

Use our secured servers or your own trusted host.

### REFERRAL SYSTEM

Full featured solution with API to arrange airdrops and bounty programs.
