

# Daonomic

**Tokenize a company, a fund or other assets.  
Unlock liquidity. Reach global investors.**

Automated solution to issue security tokens (equity, commodity, real estate, debt, etc.), launch security token sale, migrate securities and real-life assets to the blockchain. Tokenization made simple - no coding required!

## Benefits

### EASY & FAST

Arrange everything for Security Token Issuance and Securities Token Management.

### SECURE

#### End-to-end solution

The platform itself doesn't hold crypto coins received from token buyers. Instead, they go directly to the issuer's wallet.

#### Secured as dApps

Investor account and Token Management dashboard build as dApps, so all the actions needs to be signed with Issuer digital signature and goes directly to blockchain.

#### Real-time backups

All production systems and data are duplicated in the real time.

### ALL TOKEN TYPES

Equity, Commodity, Real Estate, Debt and other Securities.

### USD BASED PRICING

Token prices are shown in USD based on the current market rates of cryptocurrencies.

### STABLE COINS SUPPORT

Support DAI stable coin as payment method. Ability to convert raised ETH to DAI trustless and automatically.

## Features

### INVESTOR DASHBOARD

Personal investor accounts for token buyers. Customizable investor accounts according with a company branding guidelines.

### TOKEN ADMINISTRATION PANEL

Modern UI for manage Token issuance process, KYC verification and Token Sale Campaign. Ability to create and release Token lockups. Manage referral system.

### ACCEPT CRYPTO

Proprietary solution to accept payments in various cryptocurrencies for token sales from decentralized wallets or exchanges.

### SMART CONTRACT GENERATOR

Self-serve solution to create new token sales with no programming required.

### MULTIPLE KYC PROVIDERS

Pass the data to the appropriate KYC provider or use our personal KYC server hosted on your side.

### FLEXIBLE HOSTING SOLUTION

Use our secured servers or your own trusted host.

### REFERRAL SYSTEM

Full featured solution with API to arrange airdrops and bounty programs.
